

Slipseal Gas Joint Sealant

GENERAL DESCRIPTION:

Slipseal Gas Joint Sealant is specially formulated to give excellent sealing properties on both threaded and face joints. Slipseal is a non-setting compound for direct application and can be pressure tested immediately after assembly.

APPLICATION:

Slipseal is compatible with most gases and is pressure resistant up to 2.9 p.s.i. (0.2 bar). Suitable applications include Propane, Butane, LPG and Natural gas (for appliances and their auxiliary equipment only).

Slipseal is ideal for boats, camping, motorhomes, caravanning, BBQ's and most domestic gas appliances.

TECHNICAL DATA:

Appearance	Off-white paste
Base type	Refined vegetable oil
Thickener	Inorganic
Operating temperature range	-20°C to 125°C
Test pressure	0.2 bar (2.9 psi)
Storage	Store at ambient temperature in original container

PACKAGING:

Available in 400g tins packed in 24's
