

MULTIPURPOSE WHITE MARINE GREASE

GENERAL DESCRIPTION:

A high quality Lithium Soap grease, fortified with PTFE and a specially selected zinc compound to combat wear and high pressures.

A water resistant grease in fresh and salt water with good adhesion, wear resistance and a wide temperature range.

PERFORMANCE AND USAGE:

A universal grease for general lubrication.

Applications include bearings, seacocks, winches, springs, locks, outboard and inboard motor controls, furling gears, steering glands, boat trailer wheels and general maintenance.

TECHNICAL DATA:

Appearance	White paste
Base type	Lithium
Texture	Smooth
NLGI Grade	No 2
Worked penetration	265/295
Drop point	195°C
Operating temperature range	-20°C to 150°C
Water solubility	Insoluble
Storage	Store at ambient temperature in original container

PACKAGING:

Available in 500g tubs packed in 24 's
