Gear Oil Supplement

Description

MOLYSLIP 2001 G is a colloidal suspension of molybdenum disulphide with complementary additives, in a high-quality mineral lubricating oil to supplement oil in gears and transmissions.

Features and benefits

- Reduces friction between moving metal to metal surfaces.
- Reduces wear on gears and transmission systems.
- Lowers the working temperature of the oil.
- Protects against lubricant starvation.
- Protects against corrosion, increases reliability, reduces maintenance, overhauls, and expenditure on replacements. This means **INCREASED EFFICIENCY** and consequent **REDUCTION** in **COSTS**.
- Does not alter the physical or chemical characteristics of the oil to which it is added.
- The MoS₂ film formed cannot drain off bearing surfaces and is unaffected by extremes of temperature.

Instructions for use

For use in gearboxes, steering-boxes, and differentials, in all transport. **MOLYSLIP 2001 G** gear oil supplement should be added to gear and transmission oils in a minimum proportion of 5% (50ml per litre of oil) by volume at every oil change.

Packaging

250ml bottle, 205L drum.
